EXPERIENCE

SDE Intern

ITJOBXS

Jan 2026 – May 2026 | **Remote**

- Developed **8+ RESTful APIs** using **Node.js** and **Express.js** for the Job Posting module.
- Integrated the **Job Posting** page with backend APIs, enhancing data flow and reducing response delays by **nearly 10%**.
- Implemented **JWT-based authentication** and **15+ input validations** to improve application security and request validation.
- Tested and debugged backend APIs using **Postman**, resolving **20+ API** and **integration issues** during development.
- **Tech Stack:** Node.js, Express.js, React.js, REST APIs, JWT

ACHIEVEMENTS

- Solved **400+** DSA problems across LeetCode, HackerRank, CodeChef and GeeksforGeeks.
- Achieved a maximum Leetcode rating of **1785**.
- Achieved a 2 star rating on CodeChef.
- Earned a 5 star rating in Problem Solving on Hackerrank.
- Rank 16th globally in **SWOC 2026** for contributions to multiple open-source repositories using Git and GitHub.
- Placed in the **Top 15** for **Best Pitch** at the hackathon organised by **Sheryians Coding School**.

TECHNICAL SKILLS

- **Languages:** C++, C, JavaScript, Python
- **Core CS:** Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Database Management Systems, Computer Networks
- **Frameworks & Technologies:** React.js, Node.js, Express.js, HTML5, CSS3, Tailwind CSS, Bootstrap, GSAP, REST APIs, Socket.io
- **Databases & Authentication:** MongoDB, Firebase, ImageKit, JWT, Passport.js (OAuth)
- **Tools:** Git, GitHub, Postman
- **AI:** Google Gemini API, Retrieval-Augmented Generation (RAG), Pinecone

COURSEWORK SUBJECTS

- **Data Structures and Algorithms**
- **Object-Oriented Programming**
- **Database Management Systems**
- **Operating Systems**
- **Computer Networks**

PROJECTS

NOVA AI

- **Tech Stack:** ReactJS, TypeScript, Node.js, Express.js, MongoDB, Socket.io, Pinecone, Gemini API, Passport.js
- Built a full-stack web application that enables users to interact with multiple **AI agents**.
- Configured **Pinecone** for persistent vector storage and semantic **context retrieval**.
- Implemented **Socket.io** for real-time AI response streaming.
- Developed a **dashboard** to monitor token usage, response latency, and API usage costs.
- Integrated the **Google Gemini API** for AI-generated responses.
- Implemented **Google OAuth** authentication using **Passport.js**. Github

HOOKIFY

- **Tech Stack:** ReactJs, GSAP, Tailwind CSS, Node.js, Express.js, MongoDB, Google Gemini AI, Google OAuth 2.0, Passport.js, ImageKit
- Built an AI-powered web application to generate **social media captions** from images.
- Integrated **Google Gemini AI** for context aware caption generation.
- Developed a customizable **Vibe Selection** feature for tone and style control.
- Engineered dynamic **prompt orchestration** to generate personalized outputs.
- Implemented **Google OAuth** authentication using **Passport.js.**
- Integrated **ImageKit** for scalable image storage and **optimized media delivery.** Github
