Summary

Full-Stack Developer and AI/ML enthusiast with experience building scalable web applications and intelligent systems. Proficient in Java, Python, JavaScript, MERN Stack, REST APIs, and machine learning, with hands-on experience in deep learning, NLP, and transformer-based applications. Strong foundation in Data Structures & Algorithms, OOP, DBMS, and software engineering principles, with a passion for developing efficient, scalable, and AI-driven solutions.

Skills

Languages:	Java, Python, JavaScript, SQL, HTML, CSS
Frameworks & Libraries:	Node.js, Express.js, React.js, Streamlit, Tailwind CSS
Backend & Systems:	REST APIs, JWT Authentication, WebSockets (Socket.IO), Scalable Architecture
Databases:	MongoDB, MySQL, PostgreSQL
Core Concepts:	Data Structures & Algorithms, OOP, DBMS, OS Basics
Machine Learning:	Scikit-learn, NumPy, Pandas, Model Evaluation, Cross-Validation
Deep Learning:	TensorFlow, Keras, ANN, CNN, RNN (LSTM, GRU)
NLP & LLMs:	Transformer Models (BERT, RoBERTa, DistilBERT), Hugging Face Transformers, Tokenization, TF-IDF
Generative AI:	LLM Applications, Prompt Engineering, RAG (Retrieval-Augmented Generation)
Developer Tools:	Git, GitHub, Postman, Streamlit Cloud

Work Experience

Summer Research Intern – NIT Rourkela **May 2026 – July 2026**

- Developed a Machine Learning-Based Intrusion Detection System (IDS) for healthcare applications with benchmark dataset on CICIoMT2024.
- Achieved 99.86% accuracy with SMOTE+XGBoost+SHAP for intrusion detection.
- Built data preprocessing and feature engineering pipelines; evaluated ML/DL models using Accuracy, Precision, Recall, F1-Score, and ROC-AUC.
- Contributed to the development of **2 research papers** through experimentation, result analysis, and technical documentation.

Tech Contributor – GirlScript Summer of Code (GSSoC) **July 2025 – October 2025**

- Raised **25+ issues** and merged **12+ pull requests** across multiple open-source repositories.
- Implemented new features, resolved bugs, and improved project documentation.
- Collaborated with maintainers using Git, GitHub, and industry-standard open-source development workflows.

Projects

DataForge AI-Describe the Data. We Build the Intelligence. Live Demo

Turn Any Data Requirement Into a workflow,Dataset,Engine,Pipeline,Output.Describe what you need in plain English. DataForge AI plans, collects, validates, and delivers a clean, source-backed dataset — with every field traceable to its source.

AI Study Assistant (RAG-based Application) Live Demo

Built a multi-document Retrieval-Augmented Generation (RAG) system using LangChain, Groq LLM, and FAISS for context-aware question answering over unstructured PDFs. Designed a semantic retrieval pipeline using vector embeddings, chunking, and similarity search. Integrated LLM-based features such as summarization, quiz generation, and flashcards. Developed a Streamlit-based interactive interface for real-time inference.

CollabCo – Real-Time Collaborative Code Editor Live Demo

Built a real-time collaborative code editor using MERN stack and Socket.IO enabling multiple users to edit code simultaneously with low latency. Designed secure RESTful APIs with JWT-based authentication. Implemented WebSocket-based communication for real-time synchronization. Developed responsive UI using React and Tailwind CSS. Optimized backend architecture and MongoDB queries for scalable performance.

Education

2024 – 2028	B.Tech in **Electronics and Telecommunication Engineering**, **Veer Surendra Sai University of Technology, Burla**	(**GPA: 9.01**)
2024	Class 12th at **DAV Public School, KNG**	(**89.4%**)
2022	Class 10th at **DAV Public School, KNG**	(**92.2%**)

Achievements

- Achieved **First prize** in IEEE Poster Case Competition at NIT ROURKELA
- Grand Finalist in **Smart India Hackathon (2025)**.
- **Finalist** in DSA Coding Competition organized by Knowvy Perks and Events.
- Served as a **Project Mentor in SWOC 2026**, mentoring **20+ contributors** in open-source development
